

PUWER Assessor Training

Our accredited 3-day comprehensive PUWER Assessor training provides you, your technicians and engineers with the competencies needed to carryout machinery PUWER assessments.

Our training starts by introducing delegates the knowledge needed to safely carry out PUWER Assessment thru to a detailed study the PUWER Regulations, including what good and bad looks like. Training concludes with a practical PUWER Assessment on a machine.

The training consists of theory and practical exercises, including testing of a Safety Control System.

Full training pack will be provided to delegates.
